SUMMARY

As a skilled Full Stack Developer with nearly 1 year of experience, I offer expertise in Next.js, Nest.js, and Python to drive seamless web application development. Proficient in both frontend and backend technologies, I excel in delivering user-centric solutions. With a proven track record of collaborating effectively across teams, I'm poised to contribute my adaptable skill set and passion for innovation to a dynamic role where I can create impactful digital experiences.

EXPERIENCE

Software Engineer

DFM Softech Solutions   **October 2022 - July 2023**
Kochi, Kerala, India

• Leveraged Next.js and Nest.js as a Full Stack Developer at a product-focused company.

• Drove web optimization and managed the company website to enhance online presence.

• Crafted an internal software solution, enhancing operational efficiency and workflow.

• Actively contributed to backend server development for the flagship product, bolstering its capabilities.

• Seamlessly bridged frontend and backend realms, showcasing effective collaboration skills and expertise in full stack development.

PROJECTS

IDOC

January 2022 - June 2022

• Spearheaded the development of the project's backend using Node.js.

• Ensuring seamless data flow and efficient communication with IoT devices.

• Pivotal role in integrating IoT devices into the project architecture, enabling real-time data collection and analysis for vital signs monitoring.

• Designed and implemented a robust data management system.

Car Home

January 2022 - March 2022

• Spearheaded MERN Stack solution for Car Wash service, featuring User Profiling and task scheduling hierarchy.

• Enhanced customer engagement through personalized experiences and streamlined appointment scheduling.

• Optimized administrative tasks with user-request tracking, enabling efficient delegation to local service points.
